

Boa

Fernando and Humberto Campana

General description:

It's a huge softly weave, similar to a large nest that holds also many people.

Completely without structure, it consists of about 120 meters of tubular filled with flexible and breathable polyurethane chips, knotted with extreme manual expertise by a group of highly specialised people. The realisation of the huge irregular weave requires an extremely long period of time.

Just to realize the final plot, 4 people perfectly synchronized take about 2 working days. The creation of each single sofa needs more than one week of work.

The special cover conceived by the firm exclusively for this model is realised in a special velvet giving it a particular brightness.

Use:

Sofa that allows to find many types of seating position even for many people (formal, lying down, curled up): they can lay on the interlacement for feeling at ease.

Technical description:

Padding in a mixture of various density polyurethane foam and feathers.

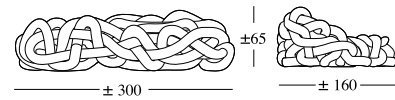

Upholstered with a special velvet.

Not removable cover.

On request, product can be realised also according to other regulations.
