

# Scrigno

## Fernando and Humberto Campana

### General description:

High or low containers with doors and drawers. The wooden internal structure lacquered in special metallic paint matches with the external cover that is composed of laser cut pieces of mirrored methacrylate skillfully overlapped, cleaned and placed totally by hand.

For a freestanding use, a "Scrigno finished" backrest is available on demand.

About 300 pieces of methacrylate are used for the realisation of each single Scrigno container.

### Technical description:
